

ERS Classroom Selection Process

Classrooms to be assessed are randomly selected on the morning of the assessment.

The random selection process for deciding which classrooms will be assessed is as follows:

- Each classroom for each age-range (ITERS-R, ECERS-R) will be written down on a piece of paper.
- The pieces of paper will be folded and placed in a container.
- The director, or whoever is in charge when the assessors arrive, will then choose one piece of paper from the container.
- That will be the classroom that the assessors observe that day.
- This process will be done to choose the classroom for the ITERS-R and ECERS-R.
- If you have a school-age program that is divided into groups, the group to be assessed will be randomly selected using the process described above.

Please fax completed classroom information forms and teacher information forms before the beginning date of your ERS timeframe.
